

Technology is impacting the benefits business much like any other industry. Paper processes are being automated. Information can be accessed 24/7 via the web and mobile. At VistaNational, we have made it our business to understand the rapidly changing technology market, help employers leverage technologies to create efficiencies within their organizations and enhance the employee's experience with their benefits. However, benefits technology does not stand alone. More and more employers are looking to simplify HR by consolidating systems that manage HR, benefits, and payroll. VistaNational can bring the solution that best fits every employers' needs.

Support Services

Technology is often under-utilized because of the effort it takes to deploy and maintain the solution. VistaNational has developed a service model to help employers maximize the utilization of their solution and improve the employee experience. We can work with your existing technology or one we recommend.

- Communicate with Insurance Companies and other Vendors who to create data interfaces
- Test Benefits Part of System for Accuracy (Rates, Plan Information, etc...)
- Analyze System for Usability
- Create and Provide Benefits Content for Portal (Plan Information, Videos, Calculators, and more)
- Provide decision support tools for employers wanting Private Exchanges or Defined Contribution Plans
